

Copper-Gold Developer

Investor Presentation

18 July 2023

Important Notice and Disclaimer

The presentation (in this projected form and as verbally presented) ("Presentation") is provided on the basis that none of the Company nor its respective officers, shareholders, related bodies corporate, partners, affiliates, employees, representatives and advisers make any representation or warranty (express or implied) as to the accuracy, reliability, relevance or completeness of the material contained in the Presentation and nothing contained in the Presentation is, or may be relied upon as a promise, representation or warranty, whether as to the past or the future. The Company hereby excludes all warranties that can be excluded by law.

The Presentation contains prospective financial material which is predictive in nature and may be affected by inaccurate assumptions or by known or unknown risks and uncertainties and may differ materially from results ultimately achieved.

The Presentation contains "forward-looking statements". All statements other than those of historical facts included in the Presentation are forward-looking statements. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, forward-looking statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by such forward-looking statements. Such risks include, but are not limited to, copper and other metals price volatility, currency fluctuations, increased production costs and variances in ore grade or recovery rates from those assumed in mining plans, as well as political and operational risks and governmental regulation and judicial outcomes. The Company does not undertake any obligation to release publicly any revisions to any "forward-looking statement".

The Presentation contains general background information about the Company and its activities current as at the date of this presentation. The information in this Presentation is in summary form only and does not contain all the information necessary to fully evaluate any transaction or investment. It should be read in conjunction with the Company's other periodic and continuous disclosure announcements lodged with the ASX, which are available at www.asx.com.au and other publicly available information on the Company available at www.rexminerals.com.au.

The Presentation does not constitute an offer, invitation or recommendation to subscribe for or purchase any security and does not form the basis of any contract or commitment.

All persons should consider seeking appropriate professional advice in reviewing the Presentation and the Company.

Overview of Rex Minerals

A copper development opportunity

- Rex owns 100% of its flagship asset, the Hillside Project, a fully permitted copper and gold asset in South Australia
 - Hillside is one of the largest undeveloped copper projects in Australia (1.9Mt copper + 1.5Moz gold Mineral Resource²)
 - Optimised and Updated Feasibility and Definition Phase Engineering Study finalised in December 2022³
 - Net Present Value of A\$847M (post-tax)⁴, implying a P/NAV of 0.19x
 - Pre-Feasibility completed for Stage 2, extending operation life to +20 years
- Following strong inbound interest, Rex has appointed Macquarie Capital to assist in managing a minority partnering process for Hillside
 - Partnering process will run in parallel with the ongoing senior debt process and will support an optimised funding package for Stage 1 development
 - Hillside Final Investment Decision targeted for mid-CY23
- Rex also owns the Hog Ranch gold project in Nevada (USA), a rapidly growing 2.2Moz⁵ epithermal gold resource

Capitalisation

Share Price (as at 18 July 2023) (A\$ per share)	\$0.245
Fully Paid Shares (m)	592.8m
Market Cap (undiluted)	~A\$145m
Cash (as at 31 March 2023)	\$12.8m
Debt	Nil
Enterprise valuation (undiluted)	~A133m
Options on Issue (unquoted)	21.1m
Consideration Rights on Issue (unquoted) ¹	15.0m

Major shareholders (as at 30 June 2023)

Ellerston Capital	8.1%
Directors & Management	6.5%
HSBC Custody Nominees (Australia)	5.1%

1. Hog Ranch Consideration Rights convertible to Rex shares upon Board approval to mine Hog Ranch, no later than 31 October 2024

2. Hillside Mineral Resource and Ore Reserve (14 December 2022)

3. Hillside Project – Optimised Feasibility & Engineering Study (14 December 2022)

4. Pricing assumptions: US\$3.92Cu; US\$1,610 Au; FX USD:AUD \$0.70. Discount rate: WACC 4.88% (Real), 8.55% (Nominal) rounded to the nearest whole number (Source: Cape Leveque Securities Pty Ltd)

5. Hog Ranch Gold Resource increases from 1.4Moz to 2.2Moz (23 March 2021)

Rex's Board and Management

The quality of the Hillside Project, has allowed Rex to attract a high-quality Board and senior management team, with large-scale mining project development and operational expertise

The Board and senior management

Name	Years of experience	Experience
Ian Smith <i>Non-Executive Chairman</i>	40+	<ul style="list-style-type: none"> Appointed in February 2019 Former Managing Director and CEO of Newcrest and Orica
Gregory Robinson <i>Non-Executive Director</i>	30+	<ul style="list-style-type: none"> Appointed in June 2021 Former Managing Director and CEO of Newcrest and CEO of Lattice Energy
Andrew Seaton <i>Non-Executive Director</i>	30+	<ul style="list-style-type: none"> Appointed in December 2021 Currently a Non-Executive Director of Strike Energy and CEO and MD of Australian Naval Infrastructure Pty Ltd (ANI) Former CFO of Santos
Richard Laufmann <i>CEO and Managing Director</i>	30+	<ul style="list-style-type: none"> Appointed in April 2015 Former CEO of Indophil Resources and Ballarat Goldfields (acquired by Lihir Gold in 2007)

Funding Update

Equity and Debt process running in parallel

Hillside Partnering Process

- Macquarie Capital - financial adviser to manage a partnering process to provide a funding package for Stage 1 to Final Investment Decision
- Strong interest from a range of Tier 1 global mining companies, trading houses and copper refiners/smelters
- Parties are working through confirmatory due diligence with the overall transaction timeline designed to accommodate internal approval requirements for counterparties
- Consistent feedback to date has been:
 - Low Geopolitical Risk
 - Strong ESG credentials
 - Upside of 1.9Mt Resource and Exploration
- Several parties have expressed interest and commenced due diligence on the potential of the project beyond Stage 1
 - Stage 2 alone, extends the mine life past 20 years and adds 479Kt of Contained Copper to the plan
- Several parties have requested time extensions to finalise bids – Rex considers this is in shareholder interests to accommodate
- We will continue to update shareholders on progress – in line with our continuous disclosure obligations

Funding Update

Equity and Debt process running in parallel¹

Banking

- Multiple Tier 1 Banks, International and Domestic
- Strong ECA interest
- Strong confidence in delivery of a material project financing solution
- Independent Expert Report being finalised by Behre Dolbear to support bank due diligence and credit approval process

Timing

- Anticipated timing for funding closure will translate into critical path for construction
- Major Contracts to be awarded post FID
- Objective is to award “long lead” in next round

1. ASX Announcement: Rex Partnering Process (6 February 2023)

Letter of Intent with Hitachi¹

LOI executed for long lead Mining Fleet – May 2023

- Rex executed a key operational readiness step for the Hillside Copper-Gold Project with the signing of a Letter of Intent (LOI) with Hitachi Construction Machinery (Australia) Pty Ltd (HCA)
- This LOI encompasses the allocation of Ultra-class mining fleet by HCA to Rex
- The equipment will cost in excess of \$100M and includes four excavator units ranging in size from 250 tonnes to 600 tonnes and twelve 300 tonne capacity haul trucks
- This LOI locks in the build slots for these long lead time items to meet the project timeline and key mining equipment availability
- The LOI is subject to final specifications and pricing. All financing alternatives and operating models remain available to Hillside, including allowing the equipment to be assigned to a third-party mining services contractor should Rex elect to do so

1. ASX Announcement: Letter of Intent with Hitachi executed for long lead Mining Fleet (23 May 2023)

Strategic Review of Hog Ranch¹

Treadstone Resource Partners appointed to assist with Strategic Review

- While preliminary in nature, discussions are ongoing with numerous parties involved in the strategic review process, including the completion of several site visits
- Strategic Review to evaluate options for the 100% owned Hog Ranch Gold Property, located in Nevada, USA
- The process is designed to review options to accelerate exploration and substantially increase the scale and hence value of the Property
- The review will consider a suite of funding alternatives and also take into account recent inbound interest in the Property
- Hog Ranch is interpreted by Rex to have the geological signature of a large-scale gold camp. This interpretation is based on the extensive work by Rex since acquisition in 2019

Photos: Hog Ranch site visits (June 2023)

1. ASX Announcement: Strategic Review of Hog Ranch Gold Property (16 May 2023)

Economic Environment

Labour, Inflation and Global Macro Thematic

- East Coast South Australia (not North or Outback - Western Australia)
- Over 2,000 early job applicants. First soft call for 64 roles answered from residents on the Yorke Peninsula
- Global Inflation?? Seems to be waning. China approaching zero and USA trending down
- Domestic inflation buffered by exchange rates
- Banking Liquidity crisis and Ukraine war is real, and Copper Price continues to hold close to Feasibility estimates
- Major Contracts still being negotiated. No lock-in or award until financial close
- All Capex will be subject to final 'range' analysis once partner process complete
- Employer advantage from our Location

Rex Minerals Discovery - Magnetics, Gravity, Seismic

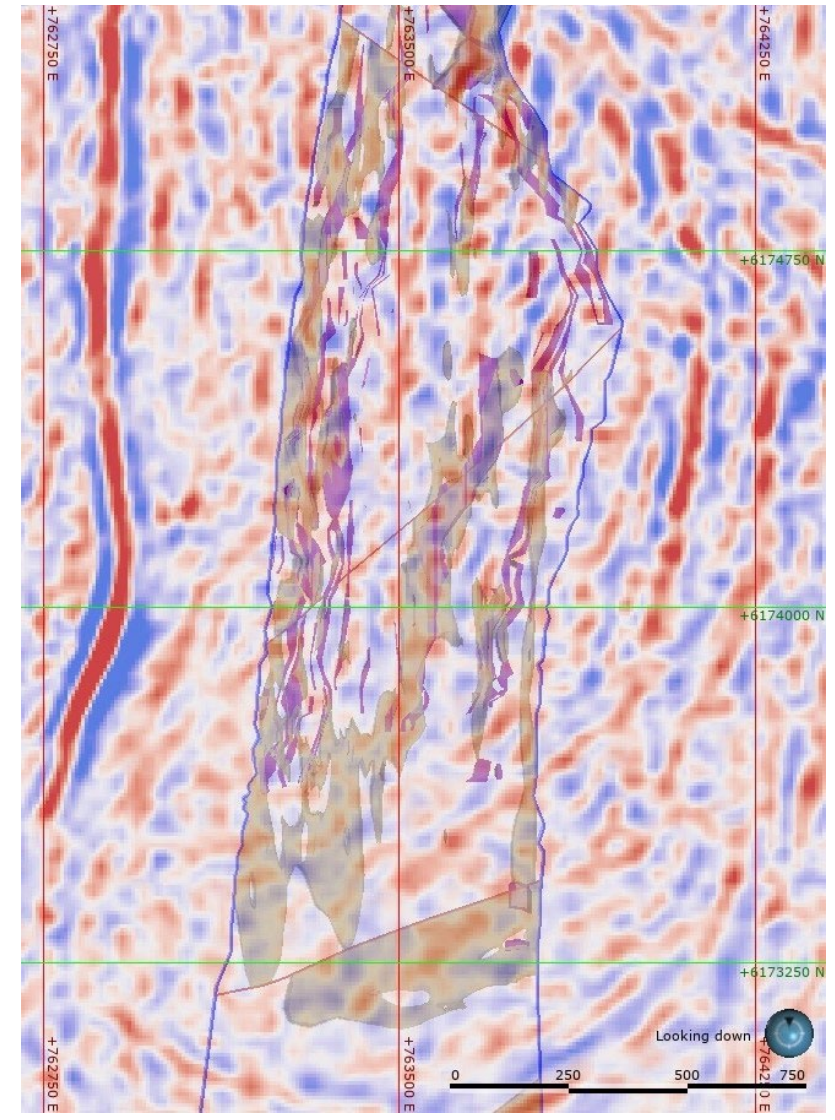

Vertical Derivative Magnetics

-100mRL Skarn and Structures

-300mRL Skarn + Seismic

Hillside

Discovery hole 2009

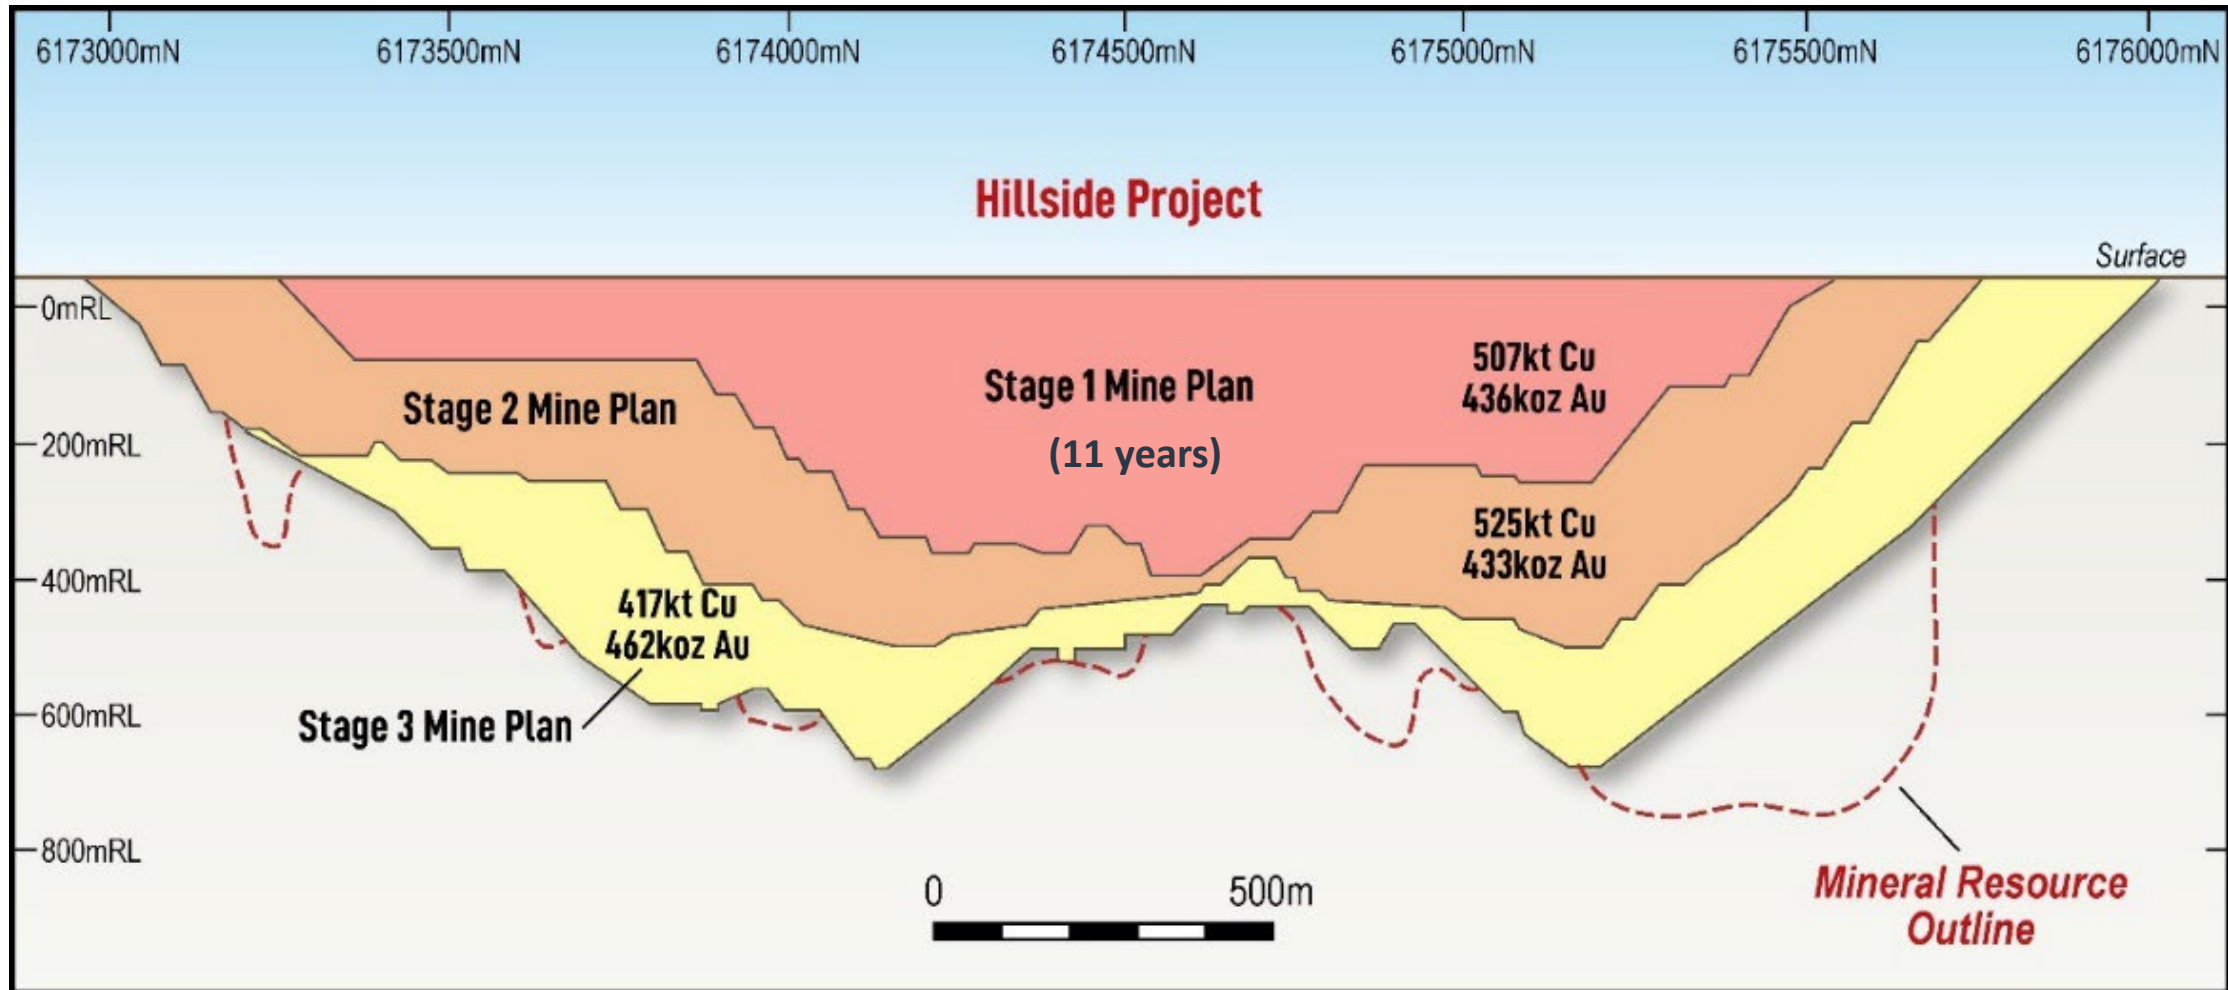

- Hillside is an Iron Oxide Copper Gold (IOCG) deposit
- Well defined geology
 - +800 drillholes, 240km of core
 - 2.3km north-south, 1,200m west-east
 - Open along strike and at depth
- Large ore zones
 - 6 main mineralised structures
 - Average true thickness of 27m
- Copper mineralisation from as shallow as 5m below surface
- 30 – 100m to be free dig
- Open at depth and along strike

Current Mineral Resource is 1.9Mt Cu

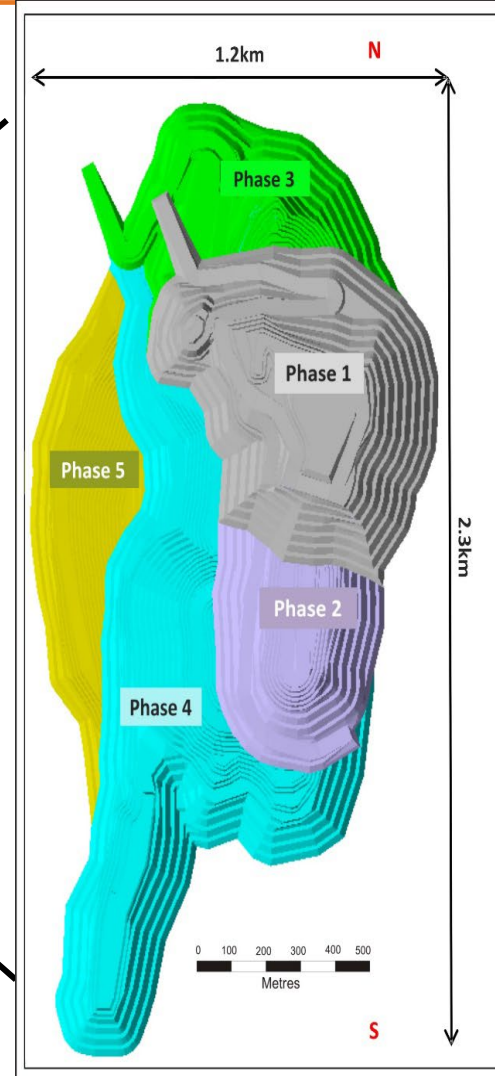

1. Hillside Mineral Resource and Ore Reserve (14 December 2022). Mineral Resources reported above a 0.2% cut-off. Measured and Indicated Resources are rounded up to two significant figures and inferred resources are rounded to one significant figure. Calculations have been rounded to the nearest Mt of ore, 0.01% Cu grade, 0.01g/t gold grade, 1,000t of Cu metal and 1000ozs of gold metal. Some apparent errors may occur due to rounding.

Hillside Future – Stage 2, 3 and beyond

1. Hillside Project - Mineral Resource and Ore Reserve Update (14 December 2022)
2. Rex doubles Hillside Ore Reserves (20 July 2021). Mineral Resources reported above a 0.2% cut-off

Site Layout – Stage 1

Pit Phase	Year Mined
Phase 1	Year -1 to 2
Phase 2	Year -1 to 2
Phase 3	Year 1 to 3
Phase 4	Year 2 to 8
Phase 5	Year 6 to 11

Hillside Project

Stage 1 - Open Pit Phases

Map Projection: MGA Zone 53 (GDA94)
 Author/Office/Date: C. Went, Adelaide, 08/11/2022
 Contextual sources: Rex Minerals Datasets

Plant layout – Design to Expand

Processing– 6-8Mtpa (expandable)

Direct Tip

- 300t Ultra Class trucks
- Gyratory Crusher

Conventional Copper Flotation

- Flotation feed P_{80} 125 μ (first 1-2 years)
- 150 μ subsequent years
- Utilising the regrind, stage flotation and uranium kinetics to minimise uranium in final conc

Concentrate

- 27% copper concentrate @ 92% Cu recovery
- Very low arsenic <45ppm
- Low halides (F <100ppm & Cl <150ppm)
- Low Uranium

Processing Metallurgy De-risked

- Extensive batch, locked cycle test work
- Using Pilot plant with Isa Mill

Optimised Feasibility & Engineering Study: Project Value

Project Financial Metrics: Stage 1*

The Copper Landscape

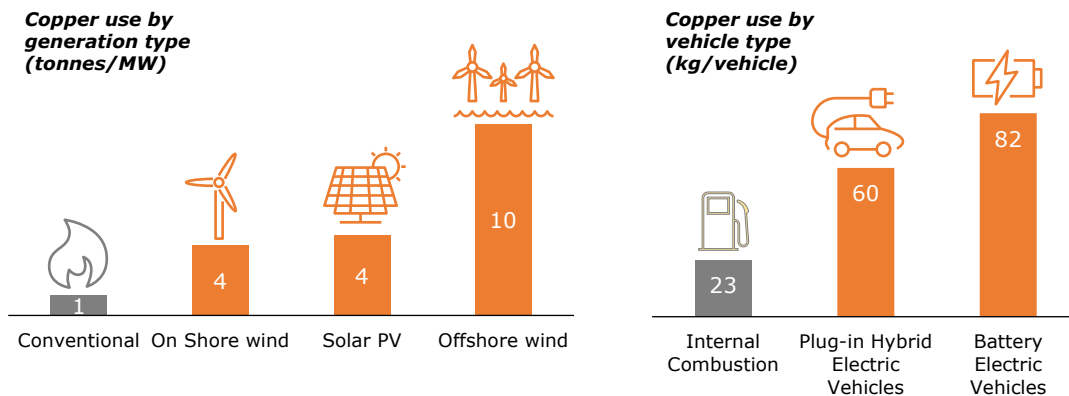

Hillside provides strong leverage to copper and the electrification thematic

- **Copper** demand outlook is fuelled by decarbonisation, electrification and the global transition to a green economy;
 - Renewable energy technologies are 4x to 10x more **copper** intensive than conventional energy production
 - EV mass adoption will see EV sales grow at 28%pa between 2020-2025, with each EV requiring up to 5x times more **copper** than traditional vehicles

Green copper demand, by technology² (kt)

Copper intensity in green scenarios¹

1. Roskill (2021), Wood Mackenzie (2021), IEA (2021)
 2. Broker research, Wood Mackenzie
 3. Macquarie Research

Environmental, Social and Governance – Hillside

Rex is committed to operating in partnership with the local communities and creating positive impacts

Environmentally

- No fragile or native forests or waterways threatened – 97% of site land has been cleared for over 100 years
- ~70% of the South Australia electricity grid is renewable, moving to 85% in 2025/26 and 100% by 2030¹

Socially

- Transformative local employment opportunities
- Working with the Narungga Aboriginal community

Government & Community

- Strong support from the Yorke Peninsula community with a formal Hillside Community Engagement Plan (CEP) in place
- Over \$200M in State Royalties
- Investment in local infrastructure such as water, power and roads
- Direct workforce of over 400 people and over 500 people during construction

South Australia leads the world in renewables

2021 share of wind and solar electricity produced by region¹

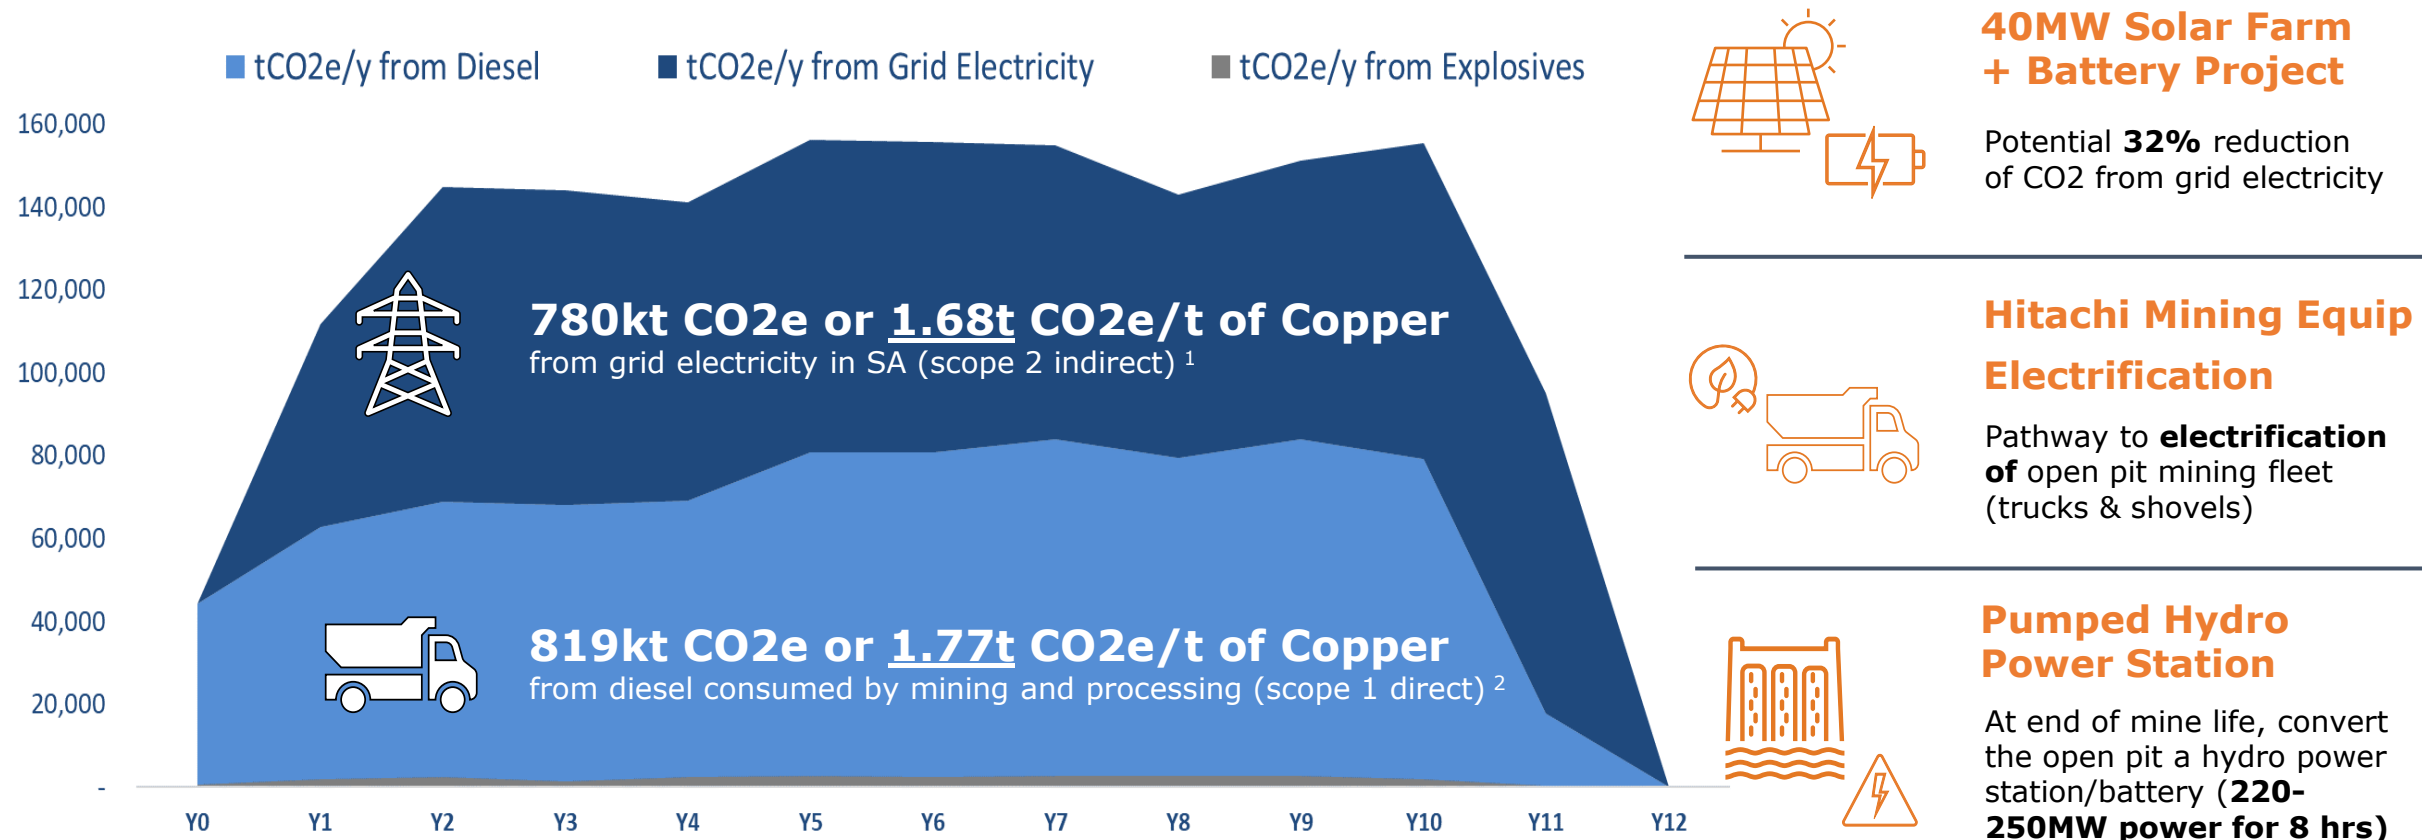

1. Enerdata2021, DTI analysis

Hillside CO₂ Emissions (Scope 1 and 2)

Baseline: 3.51t CO₂e per 1 tonne of Copper in concentrate (LOM= 1,624kt CO₂e)

Rex is working on **three carbon initiatives** to reduce and offset carbon footprint at Hillside

1. 0.35 kg tCO₂e/kWh grid electricity in South Australia 2011-2022
 2. 2.70 kg tCO₂e/litre diesel

40MW Solar Farm plus Battery Project

Rex is investigating feasibility of building a 40MW solar farm plus battery on its own land at Hillside to supply **low-cost renewable electricity for its Hillside operation**

Proposed Location of the 40MW Hillside Solar Farm

Proposed Location

- Rex's own land (not utilised by Stages 1 & 2)
- ~90 ha
- Relatively low agricultural value (along the coast)
- Next to Hillside operation

Project Status

- Tendering for undertaking the Feasibility Study
- Several developers interested

Pumped Hydro Power Station (17-20GWh)

Rex has examined a conceptual pumped hydro power station at the end of the open pit life. The power station could provide **220-250MW** with enough storage capacity to **run for 80 hours**

Conceptual Design of the Pumped Hydro Power Station

How It Works

- Upper Reservoir: the ocean
- Lower Reservoir: bottom of pit
- Drop height from upper to lower reservoir: 220-250m
- At times of high-power demand (or when solar/wind is not available), water moves from upper to lower reservoir and pass through a turbine to generate power and return power to grid (Discharging)
- At times of low-power demand, use excess power from grid to pump water from lower to upper reservoir (Recharging)

Hillside Unique Advantages

- Pit is very close to the ocean (<1km), saving water pipes
- Easy to connect hydro power to grid: 132kV transmission line & substation will be built for stage-1 operation. Minimum additional infrastructures required
- Use sea water instead of fresh water
- Potential to integrate Hillside hydro power station with Hillside solar farm, making a "micro-grid system"

Community, People and Career Pathways

1.	Narungga campus – TAFE SA – Point Pearce
2.	Student pathways program – VET - Department for Education
3.	Ardrossan area school – trade training centre
4.	Playford Trust – Student University Scholarships
5.	Regional Development Australia (RDA) – Yorke & mid-North

Photo: Ardrossan Jetty

A black and white photograph of a desert canyon. The canyon walls are layered and eroded, showing distinct geological strata. In the foreground, a wide, sandy path leads into the distance. Several people are walking along this path, their shadows cast long on the ground. The overall scene is arid and rugged.

Hog Ranch

Gold opportunity in Nevada

Hog Ranch

Hog Ranch is a large-scale epithermal gold asset in Nevada, USA

Overview

- Previously mined from 1988 to 1992
- Acquired by Rex in August 2019
- Contained gold Mineral Resource increased from zero to 2.3Moz within 18 months of Rex ownership, at minimal cost of US\$0.69/oz
- Consists of several prospects: Bells (560koz), Krista area (1,580koz), Central Cameco/Airport (150koz), Gillam

Mineral Resources¹

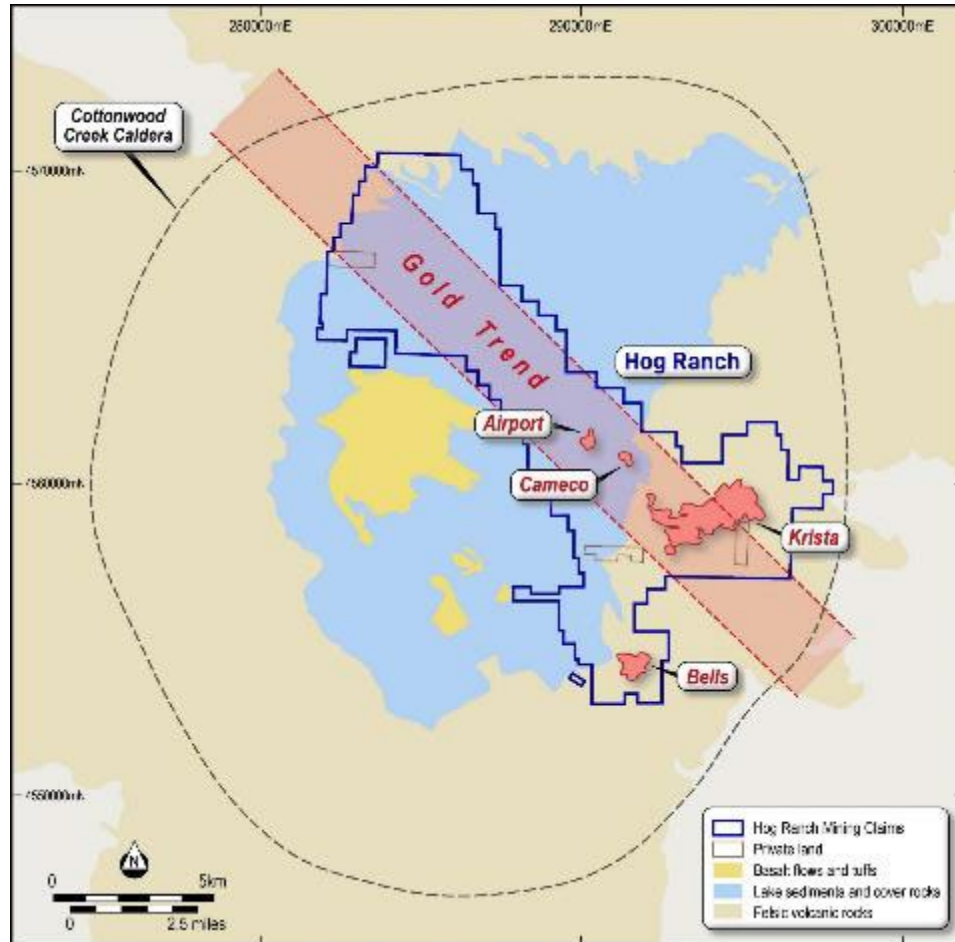

Category	Ore (Mt)	Au (g/t)	Au (koz)
Indicated	35	0.49	560
Inferred	130	0.41	1700
Total	165	0.43	2,260

Mineral Resources growth

1. Hog Ranch Gold Resource increases from 1.4Moz to 2.2Moz (23 March 2021)

Hog Ranch Camp Scale

Observations

- New datasets show overlapping evidence for large-scale epithermal alteration
- Interpreted to represent the footprint of a much larger gold system than previously understood

Small company - large company assets, in Tier 1 jurisdictions

Development Copper/Gold

- Fully permitted approved and supported
- 19% IRR, C1 costs US\$1.52/lb, 1.9Mt Cu Mineral Resource with room to grow
- Green copper, utilising renewables
- Experienced Board & Management

Exploration Growth Gold

- 2.2Moz and growing
- Discovery costs circ US\$0.70/oz
- Premier North American location

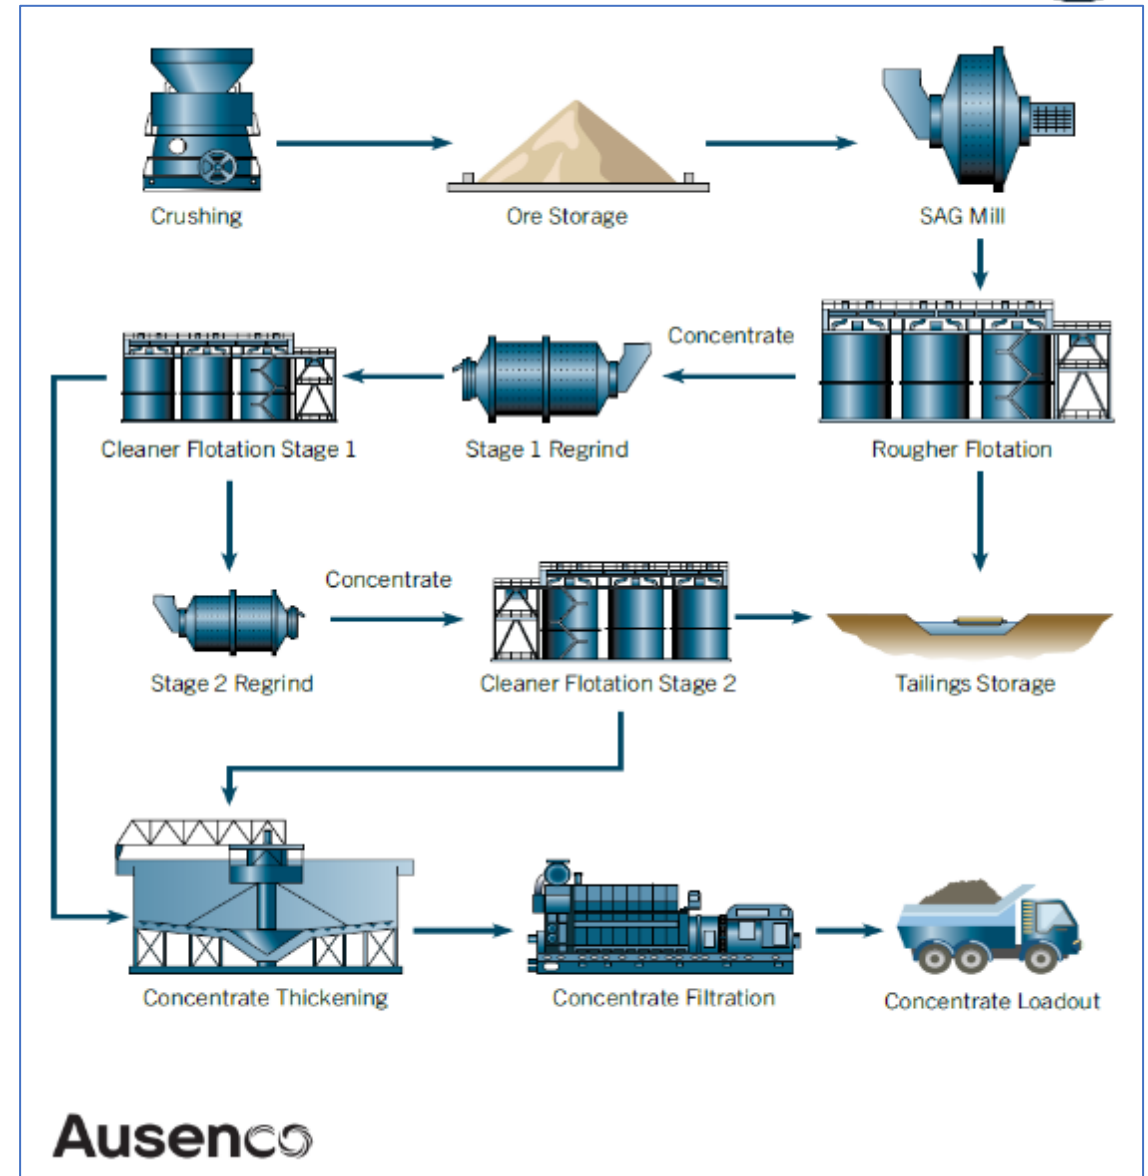

APPENDIX

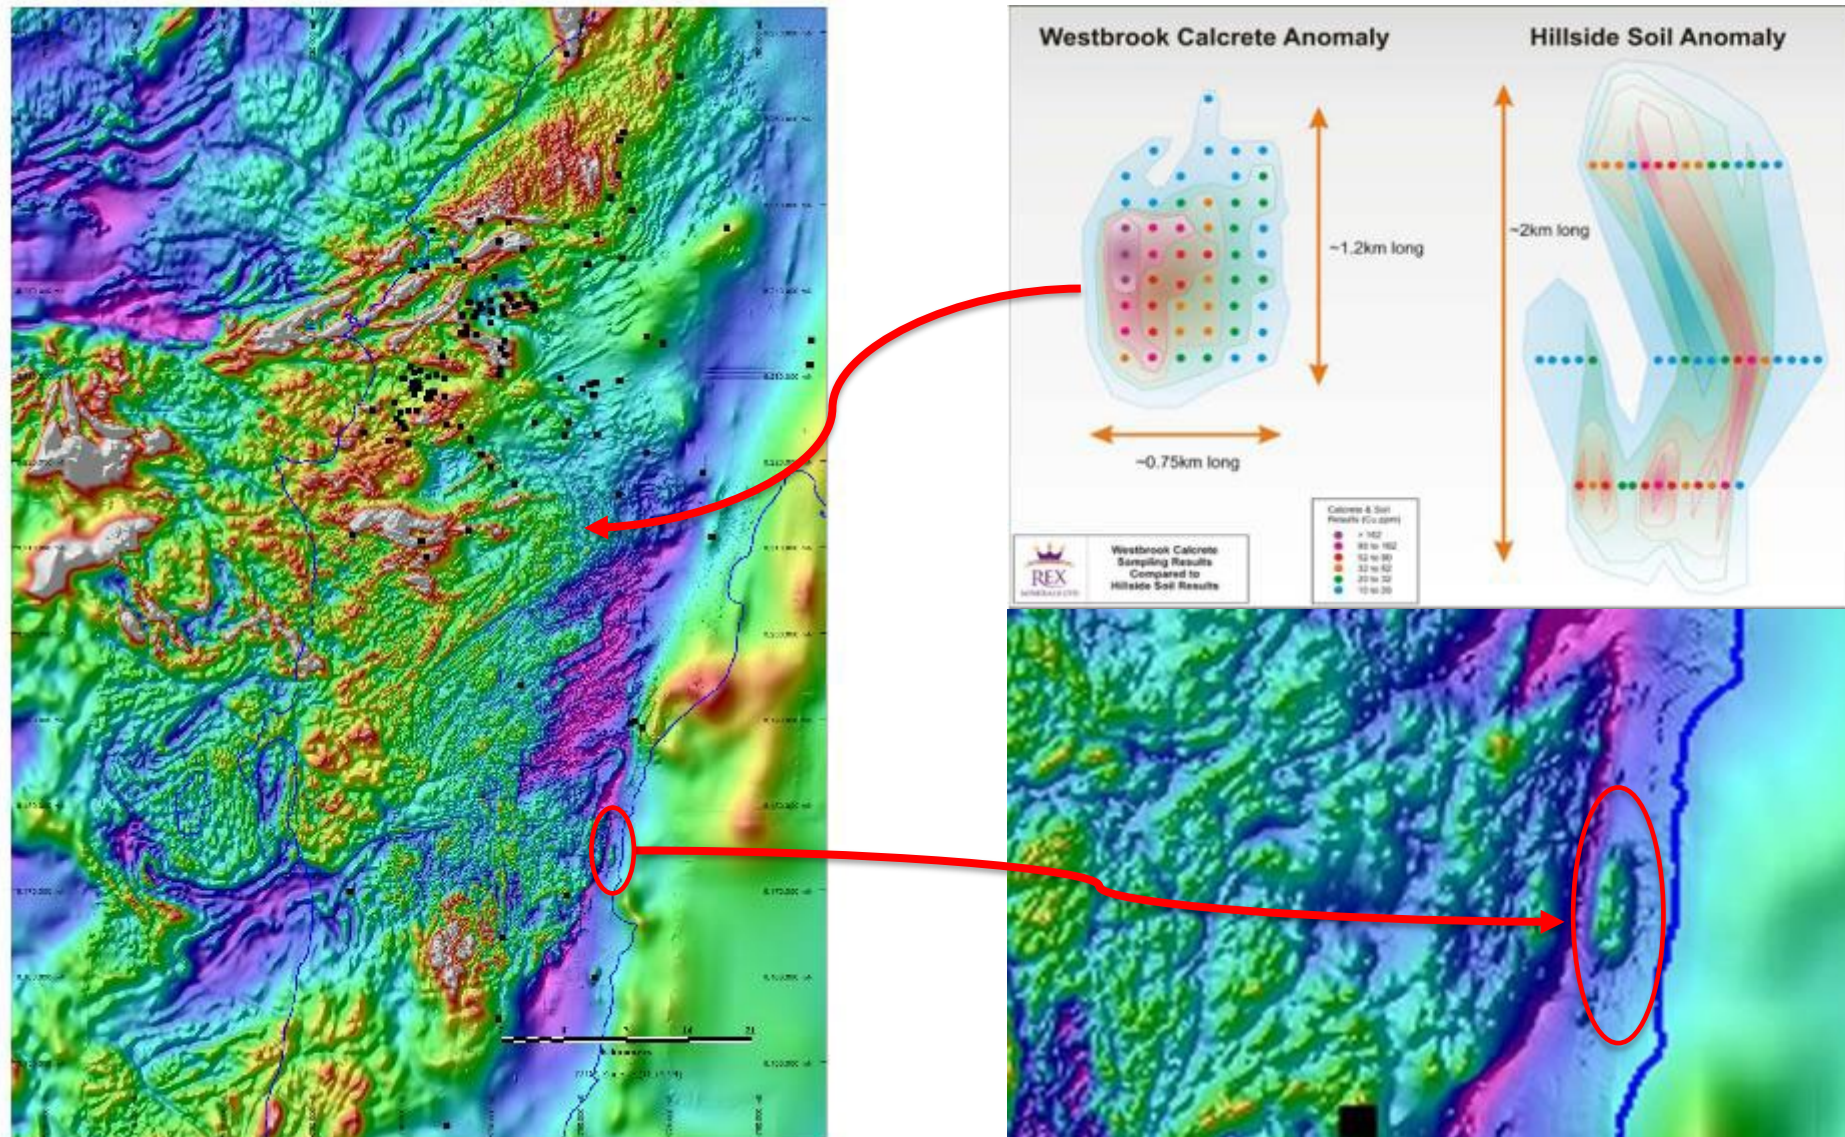

Rex Minerals & Hillside – supporting information

Processing overview

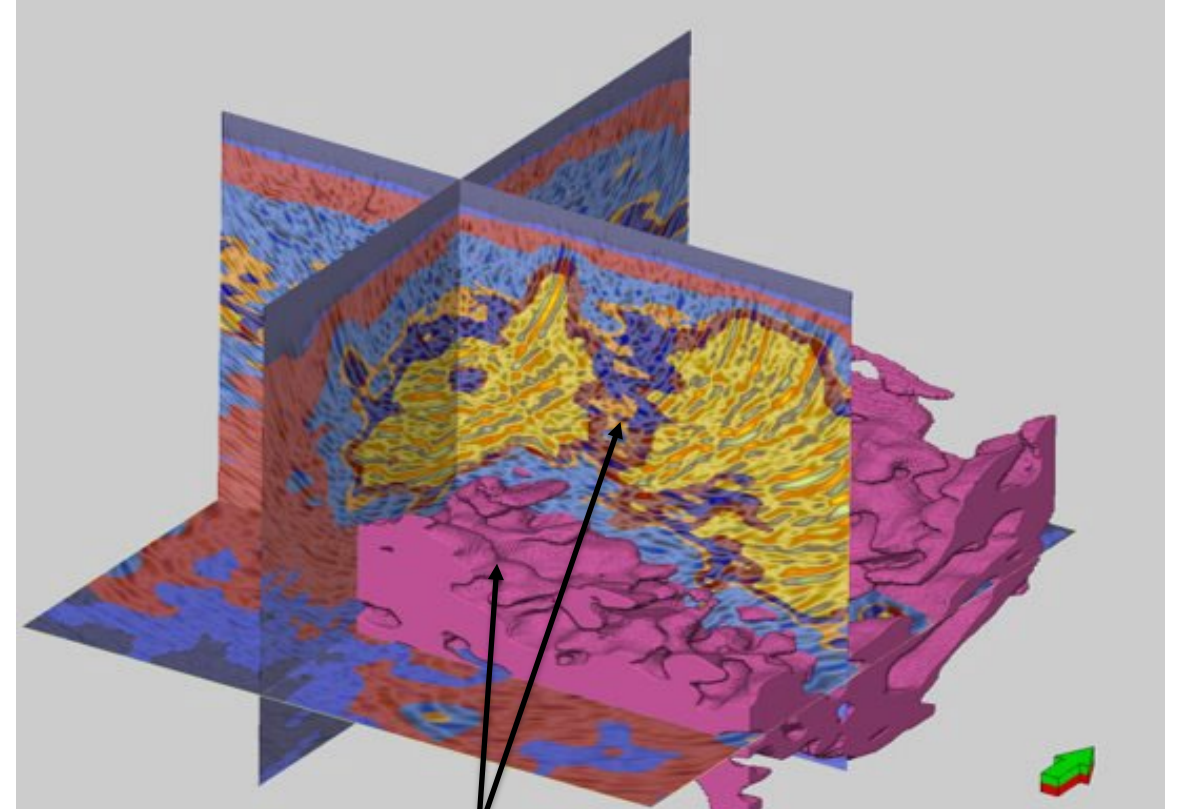

- Industry proven flow sheet, enabling rapid ramp up to production
- Gyrotory crusher feeding a Single SAG Mill, conventional flotation circuit to concentrate filtration
- Process control technology enables simplicity and flexibility of process operation
- Optimised design - sized for rapid production expansion
- Production of clean copper/gold concentrate suitable for all markets

Hunting Giant Copper Hillside vs Westbook

3D Seismic, data interpretation process ongoing

Intrusive at depth with fluid pathway above, indicated by destruction of continuous seismic reflectors (lower reflectivity domains)

NPV of A\$1,252M (pre-tax)

C1 of US\$1.52/lb copper

4.3 year payback period

Supplementary Information

Compliance statement

With reference to previously reported Mineral Resources, Ore Reserves, Feasibility Studies and Scoping Studies the Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements as referenced as footnotes to each relevant slide.

In the case of estimates of Mineral Resources and Ore Reserves that references material assumptions and technical parameters underpinning the information contained within this Presentation continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement. The estimated Ore Reserves and Mineral Resources underpinning any production target have been prepared by a competent person in accordance with the requirements in Appendix 5A (JORC code).

Base case assumptions – Hillside Project

Price assumptions for the life of the operation are: Copper US\$3.92/lb; Gold US\$1,610/oz. An exchange rate assumption of \$0.70 was used for the life of the operation. Unless otherwise stated, all dollar amounts given are in Australian dollars and are not subject to inflation/escalation factors.

Hillside Project basis of C1 and all-in sustaining cost

C1 (Direct Cash Cost)= Mining + Processing + Site general and administration + Concentrate freight + Refining charges – By-Product credits (net)

All-In Sustaining Cost (AISC) = C1 + Royalties + Rehabilitation + Sustaining capital

All-In Cost = AISC + Pre-production capital

All costs calculated in accordance with Australian Accounting Standards and International Financial Reporting Standards.

Supplementary Information (continued)

Competent persons' statements

The information in this report that relates to Exploration Results or Mineral Resources is based on, and fairly reflects, information compiled by Mr Steven Olsen who is a Member of the Australasian Institute of Mining and Metallurgy and is an employee of Rex Minerals. Mr Olsen has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Olsen consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information in this report that relates to mining and/or Ore Reserves is based on, and fairly reflects, information compiled by Mr Charles McHugh who is a Fellow of the Australasian Institute of Mining and Metallurgy and is an employee of Rex Minerals. Mr McHugh has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr McHugh consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information in this report that relates to metallurgy is based on, and fairly reflects, information compiled by Mr John Burgess who is a Fellow of the Australasian Institute of Mining and Metallurgy and a consultant to Rex Minerals. Mr Burgess has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Burgess consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Base case assumptions – Bells Project

The Bells Scoping Study (2020) price assumptions are quoted in US dollars and Gold US\$1,550/oz.

Bells Project basis of C1 and all-in sustaining cost

AISC and AIC calculated in accordance with 2018 WGC Guidance Note Update and IFRS 16, effective 1 January 2019.

C1 (Direct Cash Cost) = Mining + Processing + Site general and administration + Refining charges

All-In Sustaining Cost (AISC) = C1 + Royalties + Production tax + Rehabilitation + Sustaining capital

All-In Cost (AIC) = AISC + Pre-production capital + Equipment leasing costs
