

Corporate Presentation

An emerging Australian copper
producer of scale

May 2022

Important Notice and Disclaimer

The presentation (in this projected form and as verbally presented) ("Presentation") is provided on the basis that none of the Company nor its respective officers, shareholders, related bodies corporate, partners, affiliates, employees, representatives and advisers make any representation or warranty (express or implied) as to the accuracy, reliability, relevance or completeness of the material contained in the Presentation and nothing contained in the Presentation is, or may be relied upon as a promise, representation or warranty, whether as to the past or the future. The Company hereby excludes all warranties that can be excluded by law.

The Presentation contains prospective financial material which is predictive in nature and may be affected by inaccurate assumptions or by known or unknown risks and uncertainties and may differ materially from results ultimately achieved.

The Presentation contains "forward-looking statements". All statements other than those of historical facts included in the Presentation are forward-looking statements. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, forward-looking statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by such forward-looking statements. Such risks include, but are not limited to, copper and other metals price volatility, currency fluctuations, increased production costs and variances in ore grade or recovery rates from those assumed in mining plans, as well as political and operational risks and governmental regulation and judicial outcomes. The Company does not undertake any obligation to release publicly any revisions to any "forward-looking statement".

The Presentation contains general background information about the Company and its activities current as at the date of this presentation. The information in this Presentation is in summary form only and does not contain all the information necessary to fully evaluate any transaction or investment. It should be read in conjunction with the Company's other periodic and continuous disclosure announcements lodged with the ASX, which are available at www.asx.com.au and other publicly available information on the Company available at www.rexminerals.com.au.

The Presentation does not constitute an offer, invitation or recommendation to subscribe for or purchase any security and does not form the basis of any contract or commitment.

All persons should consider seeking appropriate professional advice in reviewing the Presentation and the Company.

Rex Minerals: Key themes

-  To become a leading ASX-listed mid-cap copper producer
-  Be a contributor to the growing trend of electrification with green copper demand to increase by 16% p.a. over the medium term
-  Reach a Final Investment Decision at Hillside by Q4 2022
Hillside is an open-pit opportunity with a ~1Mt Copper Reserve and targeting minimum 35ktpa of copper production
-  Continue to grow a highly skilled and qualified team capable of developing Rex's copper gold portfolio
-  Deliver outstanding shareholder returns

Our Vision: "To produce the minerals needed for the world we all envision"

The copper landscape

Hillside provides strong leverage to copper and the electrification thematic

- Copper spot price exceeding US\$4.45/lb¹ which is up >70% over the last 5 years
- Demand outlook is fuelled by decarbonisation, electrification and the global transition to a green economy
 - Renewable energy technologies are 4x to 10x more copper intensive than conventional energy production
 - EV mass adoption will see EV sales grow at 28% p.a. between 2020-2025, with each EV requiring up to 5x times more copper than traditional ICE vehicles

Green copper demand, by technology³ (kt)

Copper intensity in green scenarios²

1. As at 1 May 2022. 2. Roskill (2021), Wood Mackenzie (2021), IEA (2021). 3. Broker research, Wood Mackenzie. 4. Macquarie Research.

The copper landscape (cont.)

Hillside provides strong leverage to copper and the electrification thematic

- Market is fundamentally undersupplied as a result of a weak project pipeline:
 - Lack of new large-scale discoveries globally
 - Increased capital intensity to bring new operations into production due to depth, geological complexity and water scarcity
 - Trend of declining head grades
 - Massive increase in regulation and approval time frames

“
*In the past six months, we have become increasingly concerned of a **stock-out episode in the copper market** as forward fundamentals have tightened even as price action has remained muted...*
*Without any apparent softening adjustments already underway, we **believe higher prices are an inevitability***
Nicholas Snowdon, Metals Strategist, Goldman Sachs
 ”

Global copper market balance¹ (kt)

1. Macquarie Research.

Hillside: Investment proposition

Rex Minerals, and its flagship Hillside Project represents a unique, long-life, fully permitted copper project located in a premier mining jurisdiction

Copper provides strong leverage to the electrification and electric vehicle thematic

1

Shovel-ready, fully permitted copper development project of scale in a tier 1 mining jurisdiction with community support

2

Robust economics to generate strong cash flows

3

Project of scale, with a 13+ year mine life (stage 1), utilising simple mining and conventional processing methods

4

Economic expansion opportunities beyond 30 years

5

Senior and experienced Board and management, with a track-record of successful project delivery

6

Rex Minerals: Hillside is our Flagship Asset

Hillside (100% owned)

- ✓ Shovel-ready, fully permitted long life copper development project
- ✓ Simple, open pit mining, with conventional copper floatation processing
- ✓ Second quartile cost curve position, with C1 cash cost of US\$1.38/lb¹
- ✓ Project NPV of A\$1,394m² with A\$585m² upfront capital requirement
- ✓ 13+ year mine life underpinned by 988kt contained copper Reserve³
- ✓ Top 10 copper mine in Australia⁴
- ✓ Exposure to electrification and EV trends
- ✓ Robust economics to generate strong cash flows
- ✓ Fully funded until FID (cash balance of ~A\$50m as at 31 March 2022)

Rex's flagship asset – progressing towards FID in Q4 2022 and targeting first production in ~2024

1. Hillside Feasibility Costing Update (31 July 2020). Assumes US\$3.00/lb Cu price, US\$1,550/oz Au price and AUDUSD 0.70.
 2. Hillside Feasibility Costing Update (31 July 2020). Assumes US\$4.00/lb Cu price, US\$1,800/oz Au price and AUDUSD 0.65.
 3. Rex doubles Hillside Ore Reserves (20 July 2021).
 4. Based on annual production, refer to slide 11 for further information.

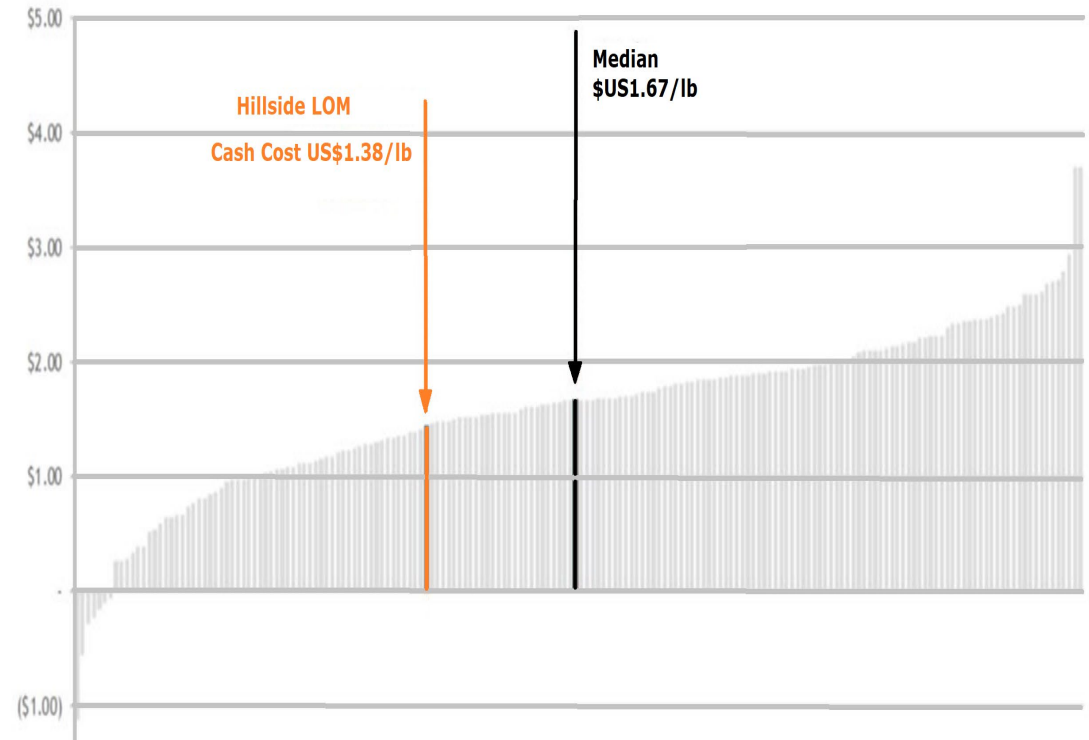

Robust economics to generate strong cash flows

The Hillside Project delivers compelling economics under a range of commodity price scenarios

Project sensitivities¹

Copper Price	US\$/lb	3.00	3.50	4.00
Gold price	US\$/oz	1,550	1,800	1,800
Exchange rate (AUDUSD)	FX	0.70	0.70	0.65
Post-Tax NPV _{5%}	A\$m	501	869	1,394
Post-Tax IRR	%	16.2	23.2	32.0
C1 cash costs	US\$/lb	1.38	1.30	1.18
AISC	US\$/lb	1.60	1.55	1.44

Cash Cost Curve (ex-Africa)

1. Additional Information to Hillside Feasibility Costing Update (31 July 2020).

The relative value proposition

Benchmarking Hillside against CSA

In March 2022, Metals Acquisition Corp (MAC) announced the acquisition of Glencore's CSA copper mine for US\$1.15bn¹ and a 1.5% net smelter return royalty – Hillside compares favourably across a range of key metrics further demonstrating strong value potential

Hillside

CSA⁵

Commodity	Copper (gold by-product)	Copper (silver by-product)
Mine life	13+ years (stage 1) ⁴	15+ years (2036)
Cu Reserves (kt)	988kt ²	262kt
Cu Resources (kt)	1,967kt ³	613kt
Production	35ktpa Cu and 24kozpa Au (LOM average)	41ktpa Cu and 372koz Ag (2022E)
C1 cash cost (after by-products)	US\$1.38/lb ⁴	US\$1.51/lb (2022E)
AISC (US\$/lb) ^{2,3}	US\$1.60/lb ⁴	US\$2.62/lb (2022E)

1. On 17 March 2022, Metals Acquisition Corp (MAC) announced the acquisition of Glencore's CSA copper mine for US\$1.15bn (including US\$50m of equity in MAC) and a 1.5% net smelter return royalty. The transaction is expected to be completed in 2022, subject to the approval of MAC's shareholders and other customary closing conditions.

2. Rex doubles Hillside Ore Reserves (20 July 2021).

3. Hillside Project - Mineral Resource and Ore Reserve Update (25 May 2015).

4. Hillside Feasibility Costing Update (31 July 2020). Assumes US\$3.00/lb Cu price, US\$1,550/oz Au price and AUDUSD 0.70.

5. All figures sourced from MAC CSA Mine Acquisition Investor Presentation (March 2022).

The relative value proposition (cont.)

Benchmarking Rex Minerals (select ASX copper peers)

Hillside's competitive advantage

- With nearly 1Mt of Cu Reserves, Rex compares favourably to mid-cap ASX producing peers, Sandfire and 29 Metals
- The Hillside Project also has a number of key competitive advantages:
 - ✓ Fully permitted
 - ✓ Tier 1 jurisdiction (South Australia #10 Fraser Institute ranking)
 - ✓ Simple mining & conventional processing
 - ✓ Saleable clean concentrate

Note: Market data as at 2 May 2022.

1. Rex doubles Hillside Ore Reserves (20 July 2021).

2. Aeris Reserves and market cap adjusted for the acquisition of Round Oak as announced on 28 April 2022.

Project of scale, with a 13+ year mine life, utilising simple mining and processing methods

Hillside to be a top 10 Australian copper mine (as measured by production) with peer mines typically owned by the majors and commanding significant market valuations

Australian copper projects >30ktpa Cu

Asset	Owner	Reserves (Cu, kt, 100% basis)	Production (Cu, kt, 100% basis) ¹
Olympic Dam	BHP	8,683	205
Mt Isa	GLENCORE	462	92
Prominent Hill	OZ	574	63
Ernest Henry	Evolution Mining	769	60
Carrapateena	OZ	2,300	55
DeGrussa	Sandfire	72	42
CSA	METALS ACQUISITION CORP	262	41
#8 Hillside (stage 1)	REX Minerals Ltd	988 ²	35
Northparkes	CMOC	730	35

Hillside to be a top 10 Australian copper mine by production

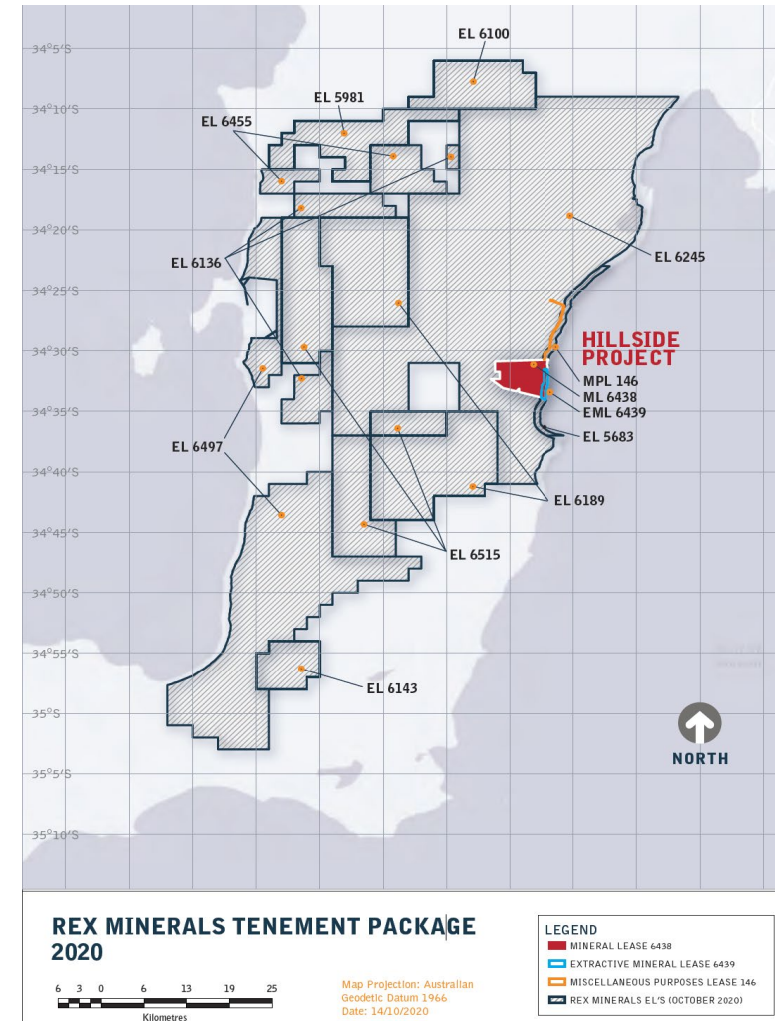

1. Last disclosed full year production, unless otherwise stated. CSA based on 2022E production. Ernest Henry based on FY23E production. Northparkes based on 2020 production. Hillside based on LOM average production.
 2. Rex doubles Hillside Ore Reserves (20 July 2021).

Regional exploration potential

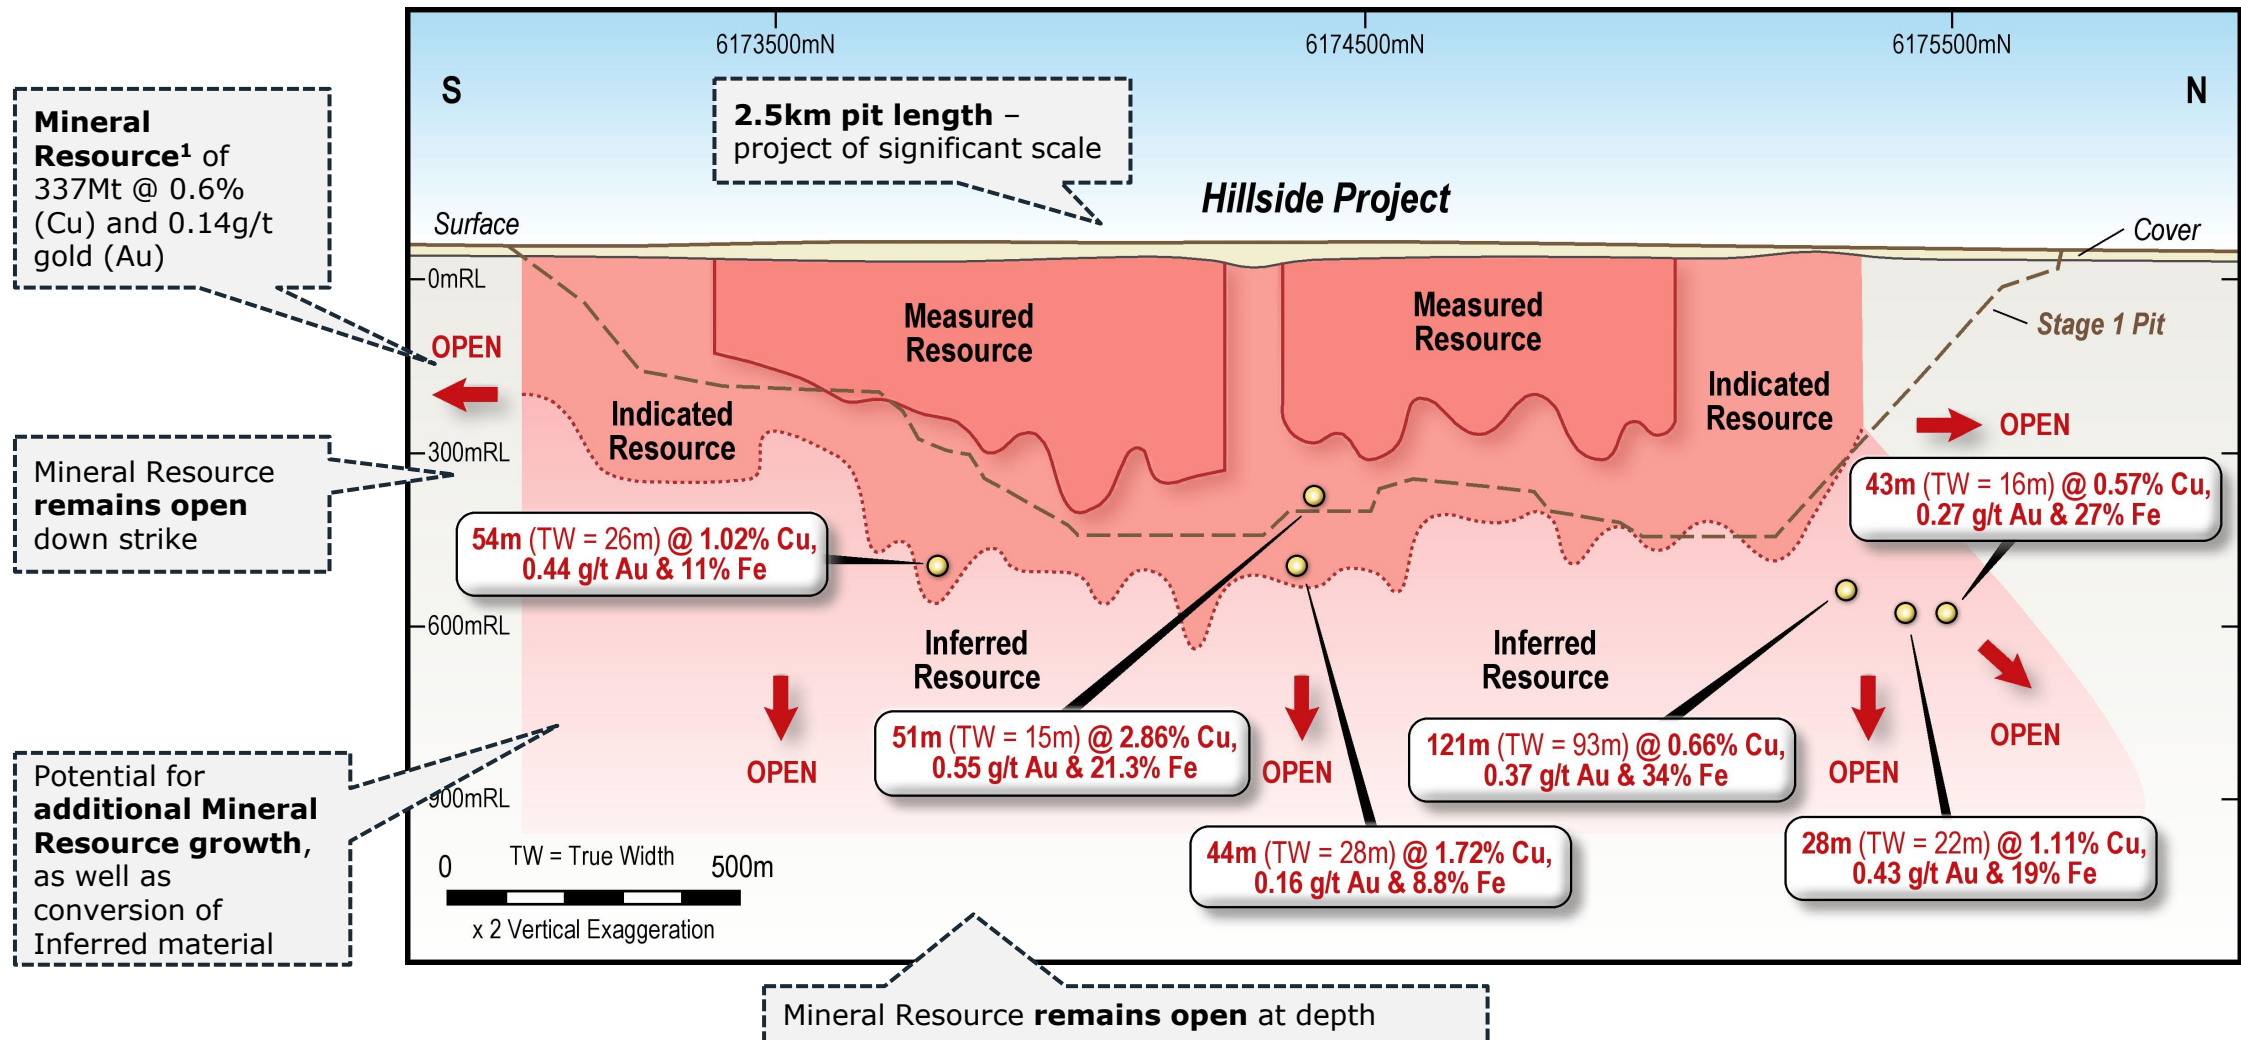

Beyond the Hillside Project, Rex controls a dominant land position along South Australia's 'copper coast'

Observations

- Dominant land position, eastern margin of the Gawler Craton
- 9 licences – 2,490km
- Shallow cover (<40m)
- Extensive datasets including magnetics, gravity, radiometrics, soil & calcrete geochemistry and drilling
- Yorke Peninsula review identified:
 - A series of targets that are of interest for haematite-predominant mineralisation of a style comparable to Carrapateena or Prominent Hill mineralisation

Ongoing growth and upside potential

1. Hillside Project - Mineral Resource and Ore Reserve Update (25 May 2015). Mineral Resources reported above a 0.2% cutoff. Measured and Indicated Resources are rounded up to two significant figures and inferred resources are rounded to one significant figure. Calculations have been rounded to the nearest Mt of ore, 0.01% Cu grade, 0.01g/t gold grade, 1,000t of Cu metal and 1000ozs of gold metal. Some apparent errors may occur due to rounding.

Rex's Board and management

The quality of the Hillside Project, has allowed Rex to attract a high quality Board and senior management team, with large-scale mining project development and operational expertise

The Board and senior management

Name	Years of experience	Experience	Selected development expertise
Ian Smith <i>Chairman</i>	40+	<ul style="list-style-type: none"> Appointed in February 2019 Former Managing Director and CEO of Newcrest and Orica 	<ul style="list-style-type: none"> Prominent Hill Copper Mine

Hillside ESG & Community benefits

Rex is committed to operating in partnership with the local communities surrounding the Hillside Project and creating positive impacts, socially economically and environmentally

Environmental

- Copper production is critical to electrification trend and forecast demand growth for electric vehicles
- Carbon emissions from cradle to gate are significantly lower for copper relative to other battery metals¹

Social

- Provide local employment opportunities
- Support the local Narungga Aboriginal community and their employment and training
- No permanent camp

Government & Community

- Strong support from the Yorke Peninsula community with a formal Hillside Community Engagement Plan (CEP) in place
- Direct wages to employees and contractors to total over \$500m over 13 years
- Direct contribution to Gross State Product (GSP) of over \$2.0bn
- Investment in local infrastructure such as water, power and roads
- Direct workforce of ~430 people in addition to ~1,350 indirect employees

1. World Bank: Minerals for Climate Action – The Mineral Intensity of the Clean Energy Transition (2020).

Hillside: key catalysts & next steps

Rex Board and senior management are committed to delivering near-term catalysts for Hillside with a view to making FID by Q4 2022

1 Expansion of project delivery team: Continue positive momentum by adding to core Hillside Project delivery team

2 Secure committed debt funding: Financing process currently underway. Strong interest received to date from a range of highly credentialed potential financiers and banking institutions

3 Delivery of final EPCM contract: Ausenco partnership to finalise project design & costs

4 Initiate offtake discussions: Continued interest to date from a range of national and international counterparties

5 Announce FID and secure long-lead capital items: Subject to financing and final Board Approval, announce FID and begin to secure long-lead items. Rex is fully funded until FID with cash balance of ~A\$50m as at 31 March 2022

Hog Ranch

Hog Ranch is a large-scale epithermal gold asset in Nevada, USA

Overview

- Last mined by WMC¹ from 1988 to 1992
- Acquired by Rex in August 2019
- Contained gold resource increased from zero to 2.3Moz within 18 months of Rex ownership, at minimal cost of US\$0.69/oz
- Consists of several prospects; Bells (560koz), Krista area (1,580koz), Central Cameco/Airport (150koz), Gillam
- Large-scale soil sampling campaign underway with first round of results anticipated in the coming months
- Look-through multiples implied by the AngloGold Ashanti / Corvus transaction³ implies a potential US\$100m+ valuation for Hog Ranch

1. Western Mining Corporation.

2. Hog Ranch Gold Resource increases from 1.4Moz to 2.2Moz (23 March 2021).

3. In September 2021, AngloGold Ashanti announced the acquisition of the remaining 80.5% stake in Corvus not already owned for C\$370m. Corvus is a TSX-listed gold and silver explorer and developer and focussed on the development of its gold-silver projects: North Bullfrog, Lynnda Strip and Mother Lode, all located in the Beatty District of Nevada, US.

Mineral Resources²

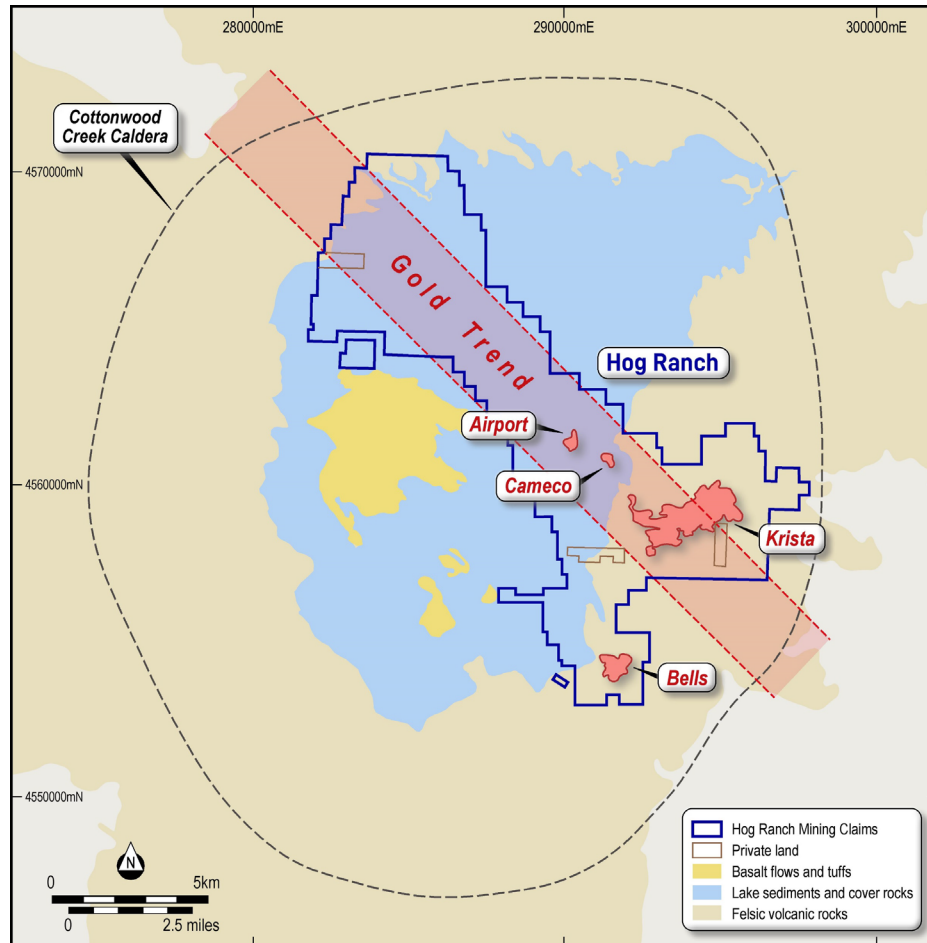

Category	Ore (Mt)	Au (g/t)	Au (koz)
Indicated	35	0.49	560
Inferred	130	0.41	1700
Total	165	0.43	2,260

Resource growth

Hog Ranch (cont.)

Hog Ranch is a large-scale epithermal gold asset in Nevada, USA

Observations

- New datasets show overlapping evidence for large-scale epithermal alteration
- Interpreted to represent the footprint of a much larger gold system than previously understood

Concluding remarks

Rex has a shovel-ready, fully permitted copper development project of scale – top 10 copper mine in Australia by annual production¹

Targeting Final Investment Decision in Q4 2022 with project fully funded until FID (cash balance of ~A\$50m as at 31 March 2022)

Project supports sustainable development while demonstrating robust economics, with Hillside generating strong cashflows throughout the commodity price cycle

Copper market outlook remains robust driven by the growing trend of electrification

Led by a senior and experienced management and Board, with a track-record of successful project delivery and ESG risk management

Our Vision: “To produce the minerals needed for the world we all envision”

1. Refer to slide 11 for further information.

APPENDIX

Hillside – supporting information

Overview of Rex Minerals

A Copper Development Opportunity

- Rex owns 100% of its flagship asset, the Hillside Project, a fully permitted copper and gold asset in South Australia
 - Hillside is one of the largest undeveloped copper projects in Australia (2.0Mt copper + 1.4Moz gold resource²)
 - Feasibility Study³ completed for Stage 1, an open-pit mine expected to produce 35ktpa copper and 24kozpa gold over a 13-year mine life
 - For Stage 1: NPV_{5%} A\$1,394m, IRR 32.0%, AISC US\$1.44/lb at Cu US\$4.00/lb, Au US\$1,800/oz, AUD:USD 0.65³
 - Pre Feasibility completed for Stage 2, extending operation life to 33 years
- Led by a highly respected Board and senior management team, with experience operating and financing large-scale mining projects
- Rex also owns the Hog Ranch gold project in Nevada (USA), a 2.2Moz⁴ epithermal gold resource, a rapidly growing success story

Capitalisation

Share Price (as at 2 May 2022) (A\$ per share)	\$0.240
Share Price Performance (since 1 January 2021)	+41%
Basic Shares (m)	592.7m
Market Cap (undiluted)	A\$142.2m
Cash (as at 31 March 2022)	\$50.0m
Debt	Nil
Enterprise valuation (undiluted)	A\$92.3m
Options on Issue (unquoted)	21.2m
Consideration Rights on Issue (unquoted) ¹	15.0m

Major shareholders (as at 2 May 2022)

Directors & Management	6.5%
Ellerston Capital	7.9%
United Super	6.1%
Grand South Development	2.5%
Curious Capital	1.3%

1. Hog Ranch consideration rights convertible to Rex shares upon Board approval to mine Hog Ranch, no later than 31 October 2024.

2. Hillside Project - Mineral Resource and Ore Reserve Update (25 May 2015).

3. Additional Information to Hillside Feasibility Costing Update (31 July 2020).

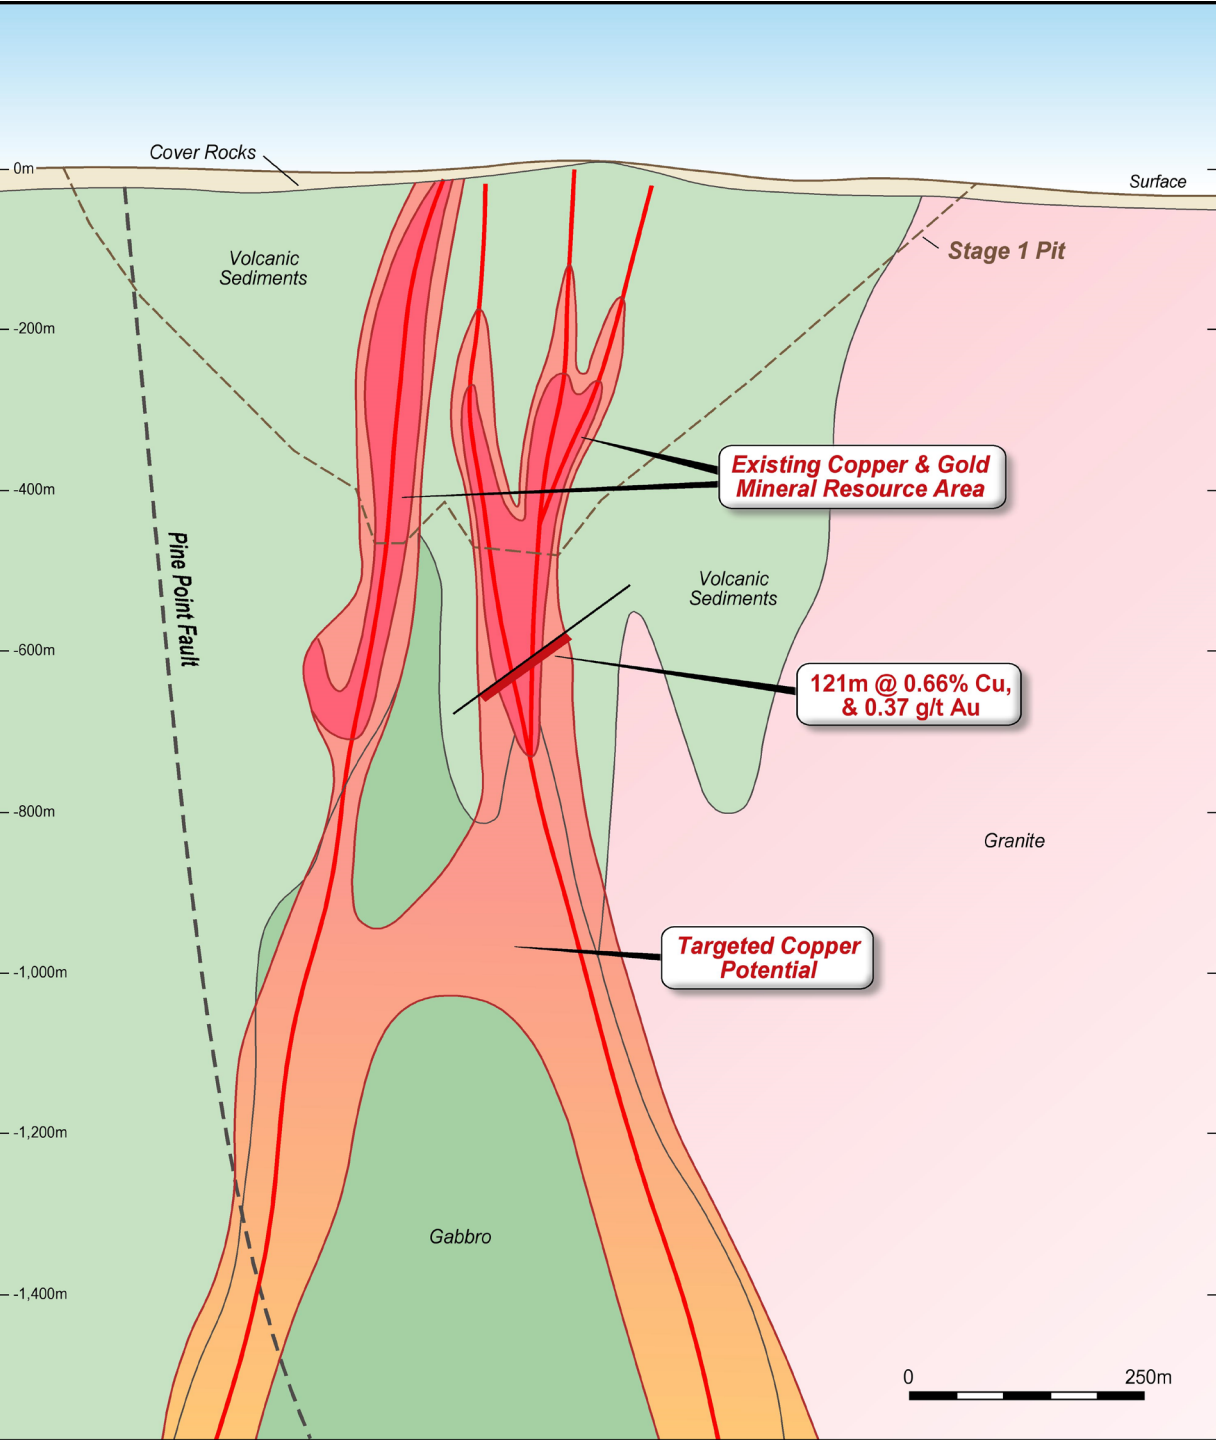

4. Hog Ranch Gold Resource increases from 1.4Moz to 2.2Moz (23 March 2021).

Hillside Mine

- Hillside is an Iron Oxide Copper Gold (IOCG) deposit
- Well defined geology
 - +800 drillholes, 240km of core
 - 2.3km north-south, 1,200m west-east
 - Open along strike and at depth
- Large ore zones
 - 6 main mineralised structures
 - Average true thickness of 27m
- Copper mineralisation from as shallow as 5m below surface
- 30 – 100m to be free dig
- Open at depth and along strike

Hillside Geology

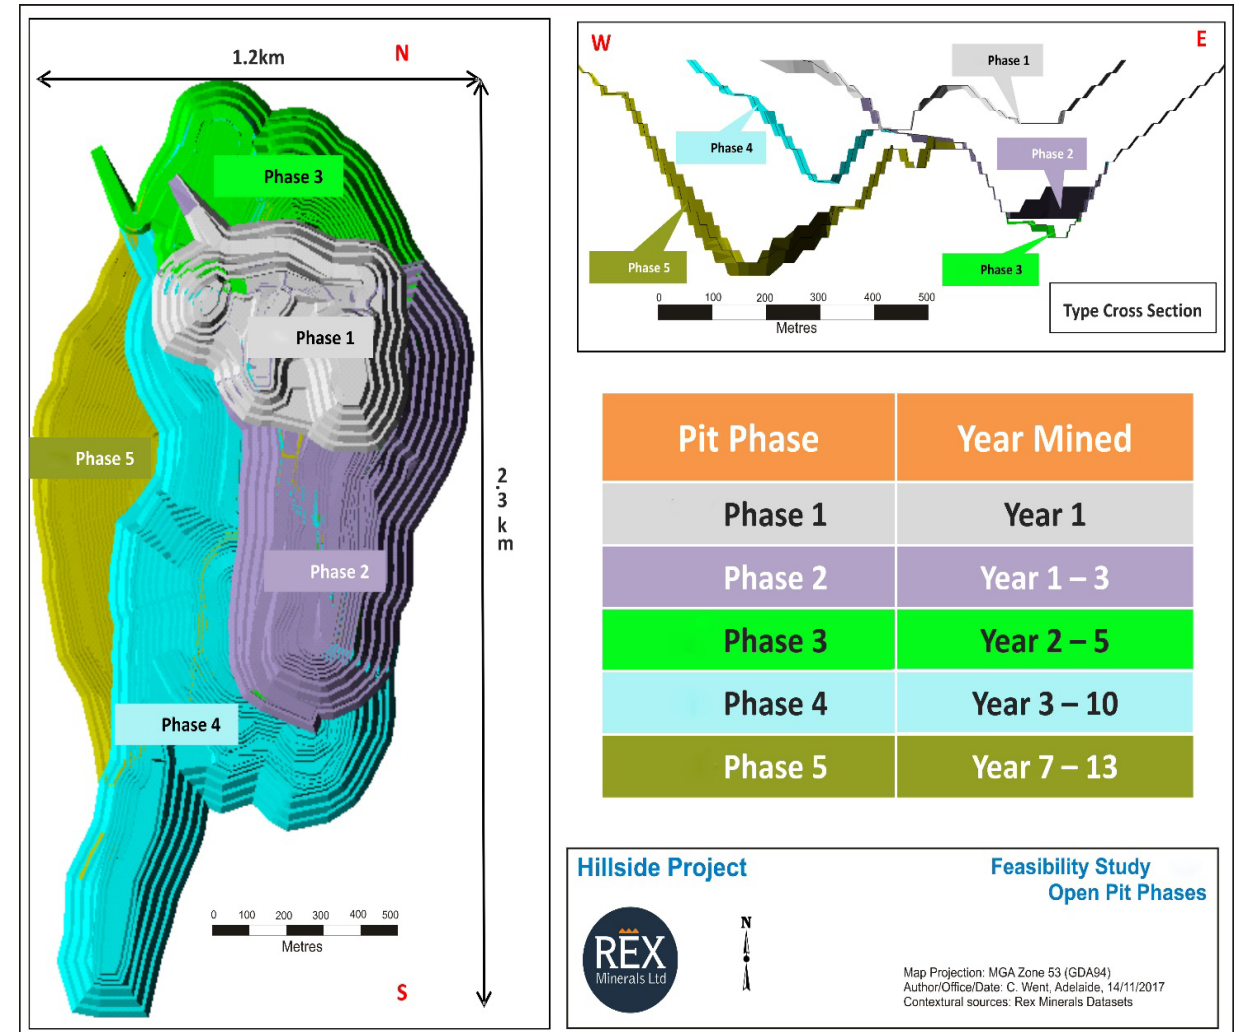

- Pine Point Fault – regional scale major feature
 - Similar to Boulder-Lefroy in Kalgoorlie
- Gabbro heat source and Hiltaba Granite typical features of South Australian IOCG
- Pre-existing Volcanic Sediments
- Skarns host much of the near surface higher grade mineralisation
- Dominant primary copper sulphide is chalcopyrite
- Simple mineralogy with low arsenic, fluorine and uranium levels
- Extremely Low potential for acid forming
 - Acid consuming carbonates in waste rock dumps and tails (ANC/MPA>2) up to 8:1

Hillside

Stage 1 Mining Plan

- Ore production rate of 6Mtpa
- A life of mine (LOM) of 13+ years
- Final pit dimensions of 2.3km north-south, 1.2km east-west and 440m depth
- Staged Pit, 5 mining phases (pushbacks)
- Pre-Strip 54Mt
- Ave Vertical Sink Rate ~34m/yr
- Strip Ratio – Operations 6.8:1
 - Pushbacks in years 3 and 8
- Truck fleet increase from 9 – 16max over life

Process Plant Designed at 6Mtpa

- Very clean concentrate of 27% copper @ 92% Cu recovery
- Very low arsenic <45ppm, low halides (F <100ppm & Cl <100ppm), low Uranium <45ppm

Processing Metallurgy De-risked

Extensive batch, locked cycle and pilot plant testwork

Tailings Dam

Down stream construction, integrated into the rock storage facility

Conventional Copper Flotation

- Flotation feed P80 125 μ (first 2 years), 150 μ subsequent years
- Utilising the regrind, stage flotation and uranium kinetics to minimise uranium in final concentration
- Coarse grind testwork underway; provides optionality for further optimisation at minimal capex

Saline Groundwater

- Saline groundwater supplemented by seawater used in the flotation circuit
- Filtered concentrate washed with potable water to remove vestigial seawater

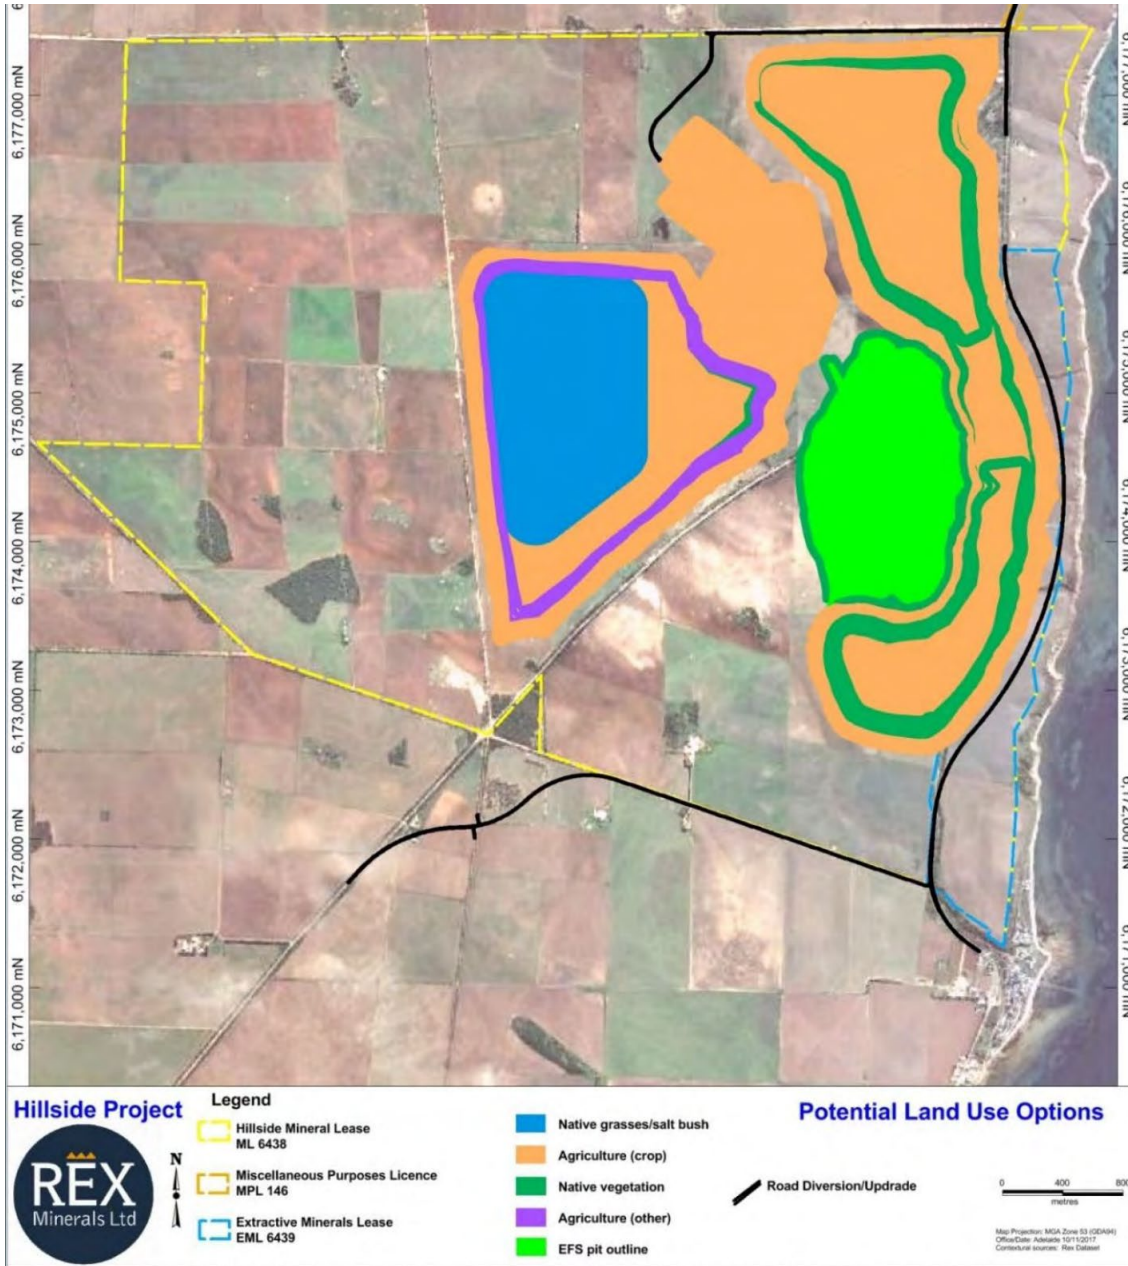

Low Processing Operating Costs ~US\$7.5/ore tonne

Hillside Rehabilitation

Progressive Rehabilitation

- Mineral Lease is 2998Ha, 1283Ha will be disturbed Stage 1
- 97% of the land had been cleared for agriculture
- Replacement of top soil and subsoil starts within first year of clearing
- By the time pit is complete in Year 12, 65% of final rehabilitation by area is complete.
- 65% of the land is returned to broad acre cropping
- Pit lake does not require rehabilitation (12% of the disturbed area)

Total Cover Type	Area (ha)	Percentage of Final Landform
Native grasses/salt bush/salt tolerant species	168.4	16%
Agricultural (cropping)	770.1	60%
Native vegetation	129.9	13%
Agricultural (other)	57.0	5%
Land that will not be rehabilitated (remaining open pit void, retained roads)	157.3	12%
Total	1,282.7*	100%

* Noting that this is 13.2ha greater than the area of disturbance identified in Table 3-3 due to the greater area of RSF slopes than disturbance footprint.

Hillside

Mineral Resources & Ore Reserves

Hillside Mineral Resources^{1,3}

Hillside Ore Reserves^{2,3}

Reserve Category	Tonnage (Mt)	Copper (%)	Gold (g/t)	Contained Copper (kt)	Contained Gold (koz)
Proved	58	0.52	0.16	301	308
Probable	123	0.56	0.13	687	515
TOTAL	182	0.54	0.14	988	823

1. Hillside Project - Mineral Resource and Ore Reserve Update (25 May 2015). Mineral Resources reported above a 0.2% cutoff. Measured and Indicated Resources are rounded up to two significant figures and inferred resources are rounded to one significant figure.

2. Rex doubles Hillside Ore Reserves (20 July 2021).

3. Calculations have been rounded to the nearest Mt of ore, 0.01% Cu grade, 0.01g/t gold grade, 1,000t of Cu metal and 1000ozs of gold metal. Some apparent errors may occur due to rounding.

Supplementary Information

Compliance statement

With reference to previously reported Mineral Resources, Ore Reserves, Feasibility Studies and Scoping Studies the Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements as referenced as footnotes to each relevant slide.

In the case of estimates of Mineral Resources and Ore Reserves that references material assumptions and technical parameters underpinning the information contained within this Presentation continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement. The estimated Ore Reserves and Mineral Resources underpinning any production target have been prepared by a competent person in accordance with the requirements in Appendix 5A (JORC code).

Base case assumptions – Hillside Project

Price assumptions for the life of the operation are: Copper US\$3.00/lb; Gold US\$1,550/oz. An exchange rate assumption of \$0.70 was used for the life of the operation. Unless otherwise stated, all dollar amounts given are in Australian dollars and are not subject to inflation/escalation factors.

Hillside Project basis of C1 and all-in sustaining cost

C1 (Direct Cash Cost)= Mining + Processing + Site general and administration + Concentrate freight + Refining charges – By-Product credits (net)

All-In Sustaining Cost (AISC) = C1 + Royalties + Rehabilitation + Sustaining capital

All-In Cost = AISC + Pre-production capital

All costs calculated in accordance with Australian Accounting Standards and International Financial Reporting Standards.

Supplementary Information (cont.)

Competent persons' statements

The information in this report that relates to Exploration Results or Mineral Resources is based on, and fairly reflects, information compiled by Mr Steven Olsen who is a Member of the Australasian Institute of Mining and Metallurgy and is an employee of Rex Minerals. Mr Olsen has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Olsen consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information in this report that relates to mining and/or Ore Reserves is based on, and fairly reflects, information compiled by Mr Charles McHugh who is a Fellow of the Australasian Institute of Mining and Metallurgy and is an employee of Rex Minerals. Mr McHugh has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr McHugh consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information in this report that relates to metallurgy is based on, and fairly reflects, information compiled by Mr John Burgess who is a Fellow of the Australasian Institute of Mining and Metallurgy and a consultant to Rex Minerals. Mr Burgess has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Burgess consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Base case assumptions – Bells Project

The Bells Scoping Study (2020) price assumptions are quoted in US dollars and Gold US\$1,550/oz.

Bells Project basis of C1 and all-in sustaining cost

AISC and AIC calculated in accordance with 2018 WGC Guidance Note Update and IFRS 16, effective 1 January 2019.

C1 (Direct Cash Cost) = Mining + Processing + Site general and administration + Refining charges

All-In Sustaining Cost (AISC) = C1 + Royalties + Production tax + Rehabilitation + Sustaining capital

All-In Cost (AIC) = AISC + Pre-production capital + Equipment leasing costs
